Outline of Crystallography for Biologists David Blow

Outline of Crystallography for Biologists is intended for researchers and students in the biological sciences who require an insight into the methods of X-ray crystallography without needing to learn all the relevant theory. The main text is purely descriptive and is readable by those with minimal mathematical knowledge. Some mathematical detail is given throughout in boxes, but these can be ignored. Theory is limited to the essentials required to comprehend issues of quality. There is an extensive reference section and suggestions for further reading for those who wish to delve deeper.

The first part 'Fundamentals' presents the underlying ideas which allow x-ray structure analysis to be carried out and provides an appropriate background to courses in structural determination.

The second part 'Practice' gives more information about the procedures employed in the course of crystal structure determination. The emphasis is on the quality measures of X-ray diffraction analysis to give the reader a critical insight into the quality and accuracy of a structure determination and to enable the reader to appreciate which parts of a structure determination may have caused special difficulty.

There is no pretence of completeness and many matters discussed in standard crystallography texts are deliberately omitted. However, issues not brought out in the standard texts are discussed, making it a useful resource for non-practising crystallographers as well.

From reader reviews:

Gregory Holloman:

Inside other case, little people like to read book Outline of Crystallography for Biologists. You can choose the best book if you appreciate reading a book. As long as we know about how is important a new book Outline of Crystallography for Biologists. You can add know-how and of course you can around the world with a book. Absolutely right, simply because from book you can recognize everything! From your country until finally foreign or abroad you can be known. About simple matter until wonderful thing you are able to know that. In this era, you can open a book or maybe searching by internet gadget. It is called e-book. You can use it when you feel weary to go to the library. Let's read.

Diana Gum:

Book is to be different for each and every grade. Book for children till adult are different content. To be sure that book is very important usually. The book Outline of Crystallography for Biologists was making you to know about other know-how and of course you can take more information. It doesn't matter what advantages for you. The book Outline of Crystallography for Biologists is not only giving you much more new information but also for being your friend when you truly feel bored. You can spend your own personal spend time to read your e-book. Try to make relationship with the book Outline of Crystallography for Biologists. You never experience lose out for everything if you read some books.

Melissa Fernandez:

Do you have something that you want such as book? The reserve lovers usually prefer to choose book like comic, limited story and the biggest one is novel. Now, why not trying Outline of Crystallography for Biologists that give your enjoyment preference will be satisfied by means of reading this book. Reading practice all over the world can be said as the opportunity for people to know world far better then how they react towards the world. It can't be claimed constantly that reading addiction only for the geeky particular person but for all of you who wants to be success person. So , for all you who want to start looking at as your good habit, you could pick Outline of Crystallography for Biologists become your starter.

Jose Hackler:

Are you kind of hectic person, only have 10 or maybe 15 minute in your day to upgrading your mind skill or thinking skill also analytical thinking? Then you are having problem with the book compared to can satisfy your limited time to read it because this all time you only find reserve that need more time to be study. Outline of Crystallography for Biologists can be your answer since it can be read by anyone who have those short free time problems.
