Stochastic Tools in Mathematics and Science (Texts in Applied Mathematics)

Alexandre J Chorin, Ole H Hald

Stochastic Tools in Mathematics and Science (Texts in Applied Mathematics) Alexandre J Chorin, Ole H Hald
"Stochastic Tools in Mathematics and Science" covers basic stochastic tools used in physics, chemistry, engineering and the life sciences. The topics covered include conditional expectations, stochastic processes, Brownian motion and its relation to partial differential equations, Langevin equations, the Liouville and Fokker-Planck equations, as well as Markov chain Monte Carlo algorithms, renormalization, basic statistical mechanics, and generalized Langevin equations and the Mori-Zwanzig formalism. The applications include sampling algorithms, data assimilation, prediction from partial data, spectral analysis, and turbulence. The book is based on lecture notes from a class that has attracted graduate and advanced undergraduate students from mathematics and from many other science departments at the University of California, Berkeley. Each chapter is followed by exercises. The book will be useful for scientists and engineers working in a wide range of fields and applications. For this new edition the material has been thoroughly reorganized and updated, and new sections on scaling, sampling, filtering and data assimilation, based on recent research, have been added. There are additional figures and exercises. Review of earlier edition: "This is an excellent concise textbook which can be used for self-study by graduate and advanced undergraduate students and as a recommended textbook for an introductory course on probabilistic tools in science." Mathematical Reviews, 2006

From reader reviews:

William Fiscus:

What do you in relation to book? It is not important to you? Or just adding material if you want something to explain what yours problem? How about your time? Or are you busy individual? If you don't have spare time to complete others business, it is make one feel bored faster. And you have free time? What did you do? All people has many questions above. They need to answer that question mainly because just their can do that will. It said that about publication. Book is familiar in each person. Yes, it is proper. Because start from on jardín de infancia until university need this specific Stochastic Tools in Mathematics and Science (Texts in Applied Mathematics) to read.

Zenaida Jackson:

Now a day people who Living in the era wherever everything reachable by interact with the internet and the resources within it can be true or not need people to be aware of each data they get. How people have to be smart in getting any information nowadays? Of course the answer is reading a book. Reading through a book can help men and women out of this uncertainty Information mainly this Stochastic Tools in Mathematics and Science (Texts in Applied Mathematics) book since this book offers you rich facts and knowledge. Of course the data in this book hundred per-cent guarantees there is no doubt in it you may already know.

Mary Sexton:

Would you one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Try and pick one book that you find out the inside because don't evaluate book by its include may doesn't work the following is difficult job because you are scared that the inside maybe not as fantastic as in the outside search likes. Maybe you answer could be Stochastic Tools in Mathematics and Science (Texts in Applied Mathematics) why because the fantastic cover that make you consider in regards to the content will not disappoint you actually. The inside or content is usually fantastic as the outside or perhaps cover. Your reading sixth sense will directly show you to pick up this book.

Pedro Turk:

Reading a guide make you to get more knowledge as a result. You can take knowledge and information coming from a book. Book is published or printed or descriptive from each source this filled update of news. Within this modern era like at this point, many ways to get information are available for an individual. From media social including newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Ready to spend your spare time to spread out your book? Or just trying to find the Stochastic Tools in Mathematics and Science (Texts in Applied Mathematics) when you necessary it?
