Here's practical, easy-to-apply information for all of today's health care coding systems. With this workbook, students will learn to code correctly and obtain the correct reimbursement for medical services. Practice exercises follow each "step" of information and conclude each unit. The workbook matches the organization of Step-by-Step Medical Coding, 2007 Edition, and offers three types of activities/exercises for each chapter: theory, practical, and reports. No other text on the market brings together such thorough coverage of all coding systems in one source!

- For each chapter, the workbook offers three types of activities/exercises:
  - Theory questions are comprised of fill-in-the-blanks, multiple choice, and true or false questions.
  - Practical activities consist of line coding exercises.
  - The reports exercises simulate a real-world experience by coding from original source documents that have been "washed" of all confidential information.
