Computer-Aided Applications in Pharmaceutical Technology (Woodhead Publishing Series in Biomedicine)

Computer-Aided Applications in Pharmaceutical Technology (Woodhead Publishing Series in Biomedicine)

Research and development in the pharmaceutical industry is a time-consuming and expensive process, making it difficult for newly developed drugs to be formulated into commercially available products. Both formulation and process development can be optimized by means of statistically organized experiments, artificial intelligence and other computational methods. Simultaneous development and investigation of pharmaceutical products and processes enables application of quality by design concept that is being promoted by the regulatory authorities worldwide. Computer-aided applications in pharmaceutical technology covers the fundamentals of experimental design application and interpretation in pharmaceutical technology, chemometric methods with emphasis of their application in process control, neural computing (artificial neural networks, fuzzy logic and decision trees, evolutionary computing and genetic algorithms, self-organizing maps), computer-aided biopharmaceutical characterization as well as application of computational fluid dynamics in pharmaceutical technology. All of these techniques are essential tools for successful building of quality into pharmaceutical products and processes from the early stage of their development to selection of the optimal ones. In addition to theoretical aspects of various methods, the book provides numerous examples of their application in the field of pharmaceutical technology.

- A comprehensive review of the current state of the art on various computer aided applications in pharmaceutical technology
- Case studies are presented in order to facilitate understanding of various concepts in computer-aided applications

From reader reviews:

Eugene Glover:

Do you have favorite book? For those who have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each book has different aim as well as goal; it means that reserve has different type. Some people feel enjoy to spend their time to read a book. They are really reading whatever they take because their hobby is usually reading a book. Consider the person who don't like looking at a book? Sometime, person feel need book once they found difficult problem or perhaps exercise. Well, probably you'll have this Computer-Aided Applications in Pharmaceutical Technology (Woodhead Publishing Series in Biomedicine).

Hector Naranjo:

Now a day folks who Living in the era exactly where everything reachable by talk with the internet and the resources in it can be true or not require people to be aware of each data they get. How many people to be smart in obtaining any information nowadays? Of course the answer is reading a book. Looking at a book can help individuals out of this uncertainty Information especially this Computer-Aided Applications in Pharmaceutical Technology (Woodhead Publishing Series in Biomedicine) book since this book offers you rich information and knowledge. Of course the information in this book hundred per-cent guarantees there is no doubt in it you probably know this.

Walter Goodwin:

The actual book Computer-Aided Applications in Pharmaceutical Technology (Woodhead Publishing Series in Biomedicine) has a lot of information on it. So when you check out this book you can get a lot of profit. The book was written by the very famous author. The author makes some research just before write this book. That book very easy to read you can obtain the point easily after perusing this book.

Charles Wright:

Do you have something that that suits you such as book? The guide lovers usually prefer to select book like comic, brief story and the biggest one is novel. Now, why not striving Computer-Aided Applications in Pharmaceutical Technology (Woodhead Publishing Series in Biomedicine) that give your pleasure preference will be satisfied by simply reading this book. Reading practice all over the world can be said as the means for people to know world a great deal better then how they react when it comes to the world. It can't be claimed constantly that reading habit only for the geeky man or woman but for all of you who wants to be success person. So , for all you who want to start looking at as your good habit, it is possible to pick Computer-Aided Applications in Pharmaceutical Technology (Woodhead Publishing Series in Biomedicine) become your starter.
