## **Calculations for Molecular Biology and Biotechnology: A Guide to Mathematics in the Laboratory 2e**

Frank H. Stephenson

Calculations for Molecular Biology and Biotechnology: A Guide to Mathematics in the Laboratory, Second Edition, provides an introduction to the myriad of laboratory calculations used in molecular biology and biotechnology.

The book begins by discussing the use of scientific notation and metric prefixes, which require the use of exponents and an understanding of significant digits. It explains the mathematics involved in making solutions; the characteristics of cell growth; the multiplicity of infection; and the quantification of nucleic acids. It includes chapters that deal with the mathematics involved in the use of radioisotopes in nucleic acid research; the synthesis of oligonucleotides; the polymerase chain reaction (PCR) method; and the development of recombinant DNA technology. Protein quantification and the assessment of protein activity are also discussed, along with the centrifugation method and applications of PCR in forensics and paternity testing.

### Key Features:

- \* Topics range from basic scientific notations to complex subjects like nucleic acid chemistry and recombinant DNA technology
- \* Each chapter includes a brief explanation of the concept and covers necessary definitions, theory and rationale for each type of calculation
- \* Recent applications of the procedures and computations in clinical, academic, industrial and basic research laboratories are cited throughout the text

### New to this Edition:

- \* Updated and increased coverage of real time PCR and the mathematics used to measure gene expression
- \* More sample problems in every chapter for readers to practice concepts

### **From reader reviews:**

#### **Tyler Smith:**

Have you spare time for just a day? What do you do when you have far more or little spare time? Sure, you can choose the suitable activity with regard to spend your time. Any person spent their very own spare time to take a go walking, shopping, or went to the particular Mall. How about open or maybe read a book eligible Calculations for Molecular Biology and Biotechnology: A Guide to Mathematics in the Laboratory 2e? Maybe it is to get best activity for you. You already know beside you can spend your time using your favorite's book, you can more intelligent than before. Do you agree with their opinion or you have various other opinion?

#### **Bridget Dell:**

This book untitled Calculations for Molecular Biology and Biotechnology: A Guide to Mathematics in the Laboratory 2e to be one of several books that will best seller in this year, honestly, that is because when you read this reserve you can get a lot of benefit upon it. You will easily to buy this book in the book retailer or you can order it by way of online. The publisher with this book sells the e-book too. It makes you quicker to read this book, since you can read this book in your Touch screen phone. So there is no reason to you to past this guide from your list.

#### **Barbara Lewis:**

Reading a e-book can be one of a lot of action that everyone in the world likes. Do you like reading book so. There are a lot of reasons why people enjoy it. First reading a reserve will give you a lot of new details. When you read a guide you will get new information due to the fact book is one of numerous ways to share the information or perhaps their idea. Second, reading through a book will make anyone more imaginative. When you reading through a book especially fictional works book the author will bring that you imagine the story how the characters do it anything. Third, you could share your knowledge to other individuals. When you read this Calculations for Molecular Biology and Biotechnology: A Guide to Mathematics in the Laboratory 2e, you can tells your family, friends and also soon about yours e-book. Your knowledge can inspire the others, make them reading a e-book.

#### **Terrance Bartholomew:**

In this time globalization it is important to someone to receive information. The information will make professionals understand the condition of the world. The condition of the world makes the information simpler to share. You can find a lot of personal references to get information example: internet, paper, book, and soon. You can view that now, a lot of publisher which print many kinds of book. The actual book that recommended for you is Calculations for Molecular Biology and Biotechnology: A Guide to Mathematics in the Laboratory 2e this publication consist a lot of the information of the condition of this world now. This book was represented how does the world has grown up. The words styles that writer require to explain it is

easy to understand. The actual writer made some analysis when he makes this book. Honestly, that is why this book appropriate all of you.
