Research Methods for Construction (Coursesmart) Richard F. Fellows, Anita M. M. Liu

Research Methods for Construction will help you instil rigour into your problem-solving, and into your reports and publications. It will be of value to construction, surveying, architecture and civil engineering students undertaking research, whether for bachelors and masters degree dissertations, or for masters and doctoral research degree theses. Now in its Fourth Edition, this remains one of the few books to provide guidance on research formulation, methodologies, and methods specifically for construction students.

Three main sections – Producing a Proposal, Executing the Research and Reporting the Results discuss the key issues in research and examine the primary approaches, both qualitative and quantitative. The methods adopted for scientific and engineering experiments, model building and simulations are discussed, as well as those employed for research into management, social and economic issues. The authors examine the requirements for data and analysis, including the important statistical considerations and a range of qualitative techniques that enable construction researchers to appreciate what needs to be evaluated in devising how research may be carried out effectively and efficiently.

This new edition has been updated to reflect current debates and concerns, including ethical issues, legislation and codes of practice concerning the collection, processing, storage, use and disposal of data. Pressures of time and funding to carry out the empirical work all too often lead to a lack of attention to how the study should be done and why. The authors address the importance of explaining the philosophical approach adopted (ontology, epistemology) and the consequent methodology. They advocate close scrutiny of the methods available for appropriateness, both academically and practically.

The fundamental theme of the book remains to facilitate a researcher's informed and justified selection of a philosophical paradigm and of appropriate methods to execute the research.

From reader reviews:

Raymond Roth:

The guide with title Research Methods for Construction (Coursesmart) possesses a lot of information that you can understand it. You can get a lot of profit after read this book. This specific book exist new information the information that exist in this guide represented the condition of the world currently. That is important to yo7u to learn how the improvement of the world. This book will bring you throughout new era of the internationalization. You can read the e-book on your own smart phone, so you can read the idea anywhere you want.

Crystal Sanchez:

Beside this Research Methods for Construction (Coursesmart) in your phone, it may give you a way to get more close to the new knowledge or information. The information and the knowledge you might got here is fresh from oven so don't end up being worry if you feel like an old people live in narrow small town. It is good thing to have Research Methods for Construction (Coursesmart) because this book offers for you readable information. Do you sometimes have book but you rarely get what it's exactly about. Oh come on, that will not end up to happen if you have this with your hand. The Enjoyable set up here cannot be questionable, including treasuring beautiful island. Use you still want to miss that? Find this book along with read it from now!

Gary Flint:

This Research Methods for Construction (Coursesmart) is fresh way for you who has intense curiosity to look for some information mainly because it relief your hunger associated with. Getting deeper you into it getting knowledge more you know otherwise you who still having little digest in reading this Research Methods for Construction (Coursesmart) can be the light food in your case because the information inside this kind of book is easy to get through anyone. These books build itself in the form that is reachable by anyone, yes I mean in the e-book application form. People who think that in e-book form make them feel sleepy even dizzy this e-book is the answer. So there is no in reading a guide especially this one. You can find actually looking for. It should be here for an individual. So , don't miss the item! Just read this e-book type for your better life as well as knowledge.

Martina Smith:

Don't be worry in case you are afraid that this book will probably filled the space in your house, you will get it in e-book means, more simple and reachable. That Research Methods for Construction (Coursesmart) can give you a lot of friends because by you investigating this one book you have factor that they don't and make a person more like an interesting person. This kind of book can be one of one step for you to get success. This reserve offer you information that probably your friend doesn't understand, by knowing more than other make you to be great men and women. So , why hesitate? Let us have Research Methods for Construction

(Coursesmart).
