The Children of Now... Evolution: How We Can Support the Fast-Forward Evolution of Our Children and All of Humanity Meg Blackburn Losey

Humanity is in a fast-forward stage of evolution. We saw this first with the Bridge Generation. For the past several decades, children are born into our world with various gifts and knowing – first introduced as Indigo Children and, as generations have passed, referred to as Crystalline Children, Star Children, and more.

In these times, we bear witness to how consciousness and the minds of the future of humanity are changing in spectacular ways. This is a phenomenon that should not be ignored. Who are these amazing beings and why are they here? What is happening that causes some kids to remember where they came from, who they were in past lives, that they are natural healers, and so sensitive that they can't keep still. How is it that they feel everything and can't distinguish what feelings belong to them and what belongs to others?

In this follow up to her bestselling book *The Children of Now*, Meg Losey revisits these spectacular children and discusses who they are becoming and how their growing influence is changing society for the better. *The Children of Now Evolution* addresses the following:

- What is the magic of these children who embody unconditional love and have the foresight to see a new future for our people and our planet?
- How do their minds work and why are they hyper-sensitive in some ways and desensitized in others?
- Is our DNA changing and taking us into a new or different physiology?
- What does autism, ADD, ADHD, bipolar disorder, Asperger's Syndrome have to do with Crystalline Children and Star Kids, if anything? Why are so many kids being drugged?
- Why are so many young adults falling off the edge into darker, more destructive thoughts and actions – from self-abuse with drugs to hurting themselves and worse?
- How are vaccines, GMO in our foods contributing to mutating human biology, particularly our DNA?
- How are we – society, parents, caregivers and guardians – failing to give these kids what they need? How can we? What will it take?
- How can we structure our schools to meet the needs of these kids? Instead of surviving their educations, how can we help them to thrive?

Losey offers concrete information for parents, schools, and others to understand what these kids need and how to help them function and flourish. Too often these children are mislabeled as ADD or ADHD or worse. She also addresses the metaphysical realities that these children (and others) perceive. There may not be monsters in the closet or under the bed, but these highly-evolved children may actually be “seeing” things that their parents or caregivers cannot. Finally, she paints a picture of what our world will look like when the “Children of Now” take over.

With new research and reports from the field *The Children of Now Evolution* is even more important to the families of today and tomorrow.

Some of you have a different opinion about book. But one aim that will book can give many info for us. It is absolutely appropriate. Right now, try to closer using your book. Knowledge or facts that you take for that, you can give for each other; you can share all of these. Book *The Children of Now... Evolution: How We Can Support the Fast-Forward Evolution of Our Children and All of Humanity* has simple shape but you know: it has great and big function for you. You can look the enormous world by open up and read a e-book. So it is very wonderful.

Christy McCurry:

Why? Because this *The Children of Now... Evolution: How We Can Support the Fast-Forward Evolution of Our Children and All of Humanity* is an unordinary book that the inside of the e-book waiting for you to snap it but latter it will surprise you with the secret the idea inside. Reading this book next to it was fantastic author who all write the book in such awesome way makes the content inside easier to understand, entertaining means but still convey the meaning totally. So , it is good for you for not hesitating having this any longer or you going to regret it. This unique book will give you a lot of advantages than the other book include such as help improving your expertise and your critical thinking technique. So , still want to delay having that book? If I ended up you I will go to the guide store hurriedly.

Renee Chagnon:

Playing with family within a park, coming to see the sea world or hanging out with close friends is thing that usually you will have done when you have spare time, and then why you don't try factor that really opposite from that. Just one activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love *The Children of Now... Evolution: How We Can Support the Fast-Forward Evolution of Our Children and All of Humanity*, you could enjoy both. It is fine combination right, you still wish to miss it? What kind of hang-out type is it? Oh occur its mind hangout fellas. What? Still don't get it, oh come on its referred to as reading friends.

William Copeland:

As a college student exactly feel bored for you to reading. If their teacher asked them to go to the library in order to make summary for some e-book, they are complained. Just very little students that has reading's internal or real their pastime. They just do what the teacher want, like asked to the library. They go to generally there but nothing reading significantly. Any students feel that reading through is not important, boring in addition to can't see colorful photos on there. Yeah, it is for being complicated. Book is very

important for yourself. As we know that on this era, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this The Children of Now... Evolution: How We Can Support the Fast-Forward Evolution of Our Children and All of Humanity can make you experience more interested to read.
