The Laws of Justice: How We Can Solve World Conflicts and Bring Peace Ryuho Okawa

In the world, conflicts, poverty and turmoil are increasingly becoming rampant.

Regional disputes and refugee issues in the Middle East.

Economic crisis in the EU.

Expansionist policy of China.

Acts of terrorism beyond national borders.

Global police officer? "Not anymore," says America.

Now, amidst the absence of international leadership, people around the world raise one pivotal question:

"What is justice in today's world?"

In "The Laws of Justice", Master Ryuho Okawa of Happy Science, an author of over 2,000 books, gives us hints to answer the above question: the world is in need of justice that can resolve both the conflicts between religions and the tyranny of materialistic nations, which are at the root of various problems in the current era.

This book takes up Western academics such as Kant's morality, Bentham's utilitarianism, Rawls' principle of justice, Piketty's analysis of wealth and inequality and Dawkins' atheist idea that religion is not something necessary. What's more, the author says that the book "took on the challenge to make God's revelation a subject of academic studies" and is something that "goes beyond the boundary of existing academia."

We must constantly think about what accords with righteousness on a global level and from the perspective of the future.

Seek justice in terms of wisdom.

Transcend hatred and embrace love.

Above is the main message of The Laws of Justice.
