Their detailed account of the nationally publicized trial and the fundamentalist Christian community's response to the bombings will be important and compelling reading for those concerned with the abortion controversy and other issues that encompass social violence and contemporary religion.

Scholars will be interested in the work as a comprehensive sociological analysis of religious fundamentalism, an ideology that the authors tie to a medieval world view. Placing anti-abortion violence in the context of social movement theory, they conclude that persons who are predisposed toward such behavior are likely to be working-class males under age 35, socially isolated from countervailing attitudes. Religious fundamentalists, they warn, will continue to utilize violence in reaction to such subjects as pornography, homosexuality, sex education, equality for females, and prayer in public schools.

For this book the authors conducted interviews with local activists on both sides of the abortion issue. They interviewed local religious fundamentalists, personnel of clinics throughout the United States that have been subjected to arson or bombing, and, when possible, persons who have been tried and convicted of those offenses. In addition, they attended the Pensacola trial and fundamentalist church services.
