## Wildlife Science: Linking Ecological Theory and Management Applications

Consciously or not, wildlife managers generally act from a theoretical basis, although they may not be fully versed in the details or ramifications of that theory. In practice, the predictions of the practitioners sometimes prove more accurate than those of the theoreticians. Practitioners and theoreticians need to work together, but this proves difficult when new management ideas and cutting-edge ecological theory are often published in separate scientific outlets with distinctly different readerships.

A compilation of the scientific papers presented at the Caesar Kleberg Wildlife Research Institute's 25th Anniversary Conference of April 2006, *Wildlife Science: Linking Ecological Theory and Management Applications* brings together these two often separate approaches to elucidate the theoretical underpinnings of wildlife management and to apply evolving ecological concepts to changes and adaptations in management practices. Gathering many of the best and greatest minds in wildlife science, this volume addresses the critically important theme of linking ecological theory and management applications. Divided into five parts, the first two parts deal with the landscape ecology of birds and mammals respectively, demonstrating the need for applied theory in gamebird management and the preservation of the cougar. Part three highlights the role of climate when applying ecological theory to habitat management and discusses the emergence of ecosystem management in managing wildlife at the ecosystem scale. Part four considers the management of wildlife disease and reveals the increasing importance of genetics in conservation and ecology. Finally, the economic and social issues affecting wildlife science round out the coverage in part five.

Applying emerging ecological theory for the advancement of wildlife management, *Wildlife Science: Linking Ecological Theory and Management Applications* provides a long awaited cooperative look at the future of ecosystem management.

### **From reader reviews:**

#### **Joe North:**

In this 21st centuries, people become competitive in every way. By being competitive now, people have do something to make these individuals survives, being in the middle of the actual crowded place and notice by surrounding. One thing that at times many people have underestimated this for a while is reading. Yes, by reading a guide your ability to survive raise then having chance to endure than other is high. For you who want to start reading any book, we give you that Wildlife Science: Linking Ecological Theory and Management Applications book as starter and daily reading e-book. Why, because this book is usually more than just a book.

#### **Barbara Fontenot:**

This book untitled Wildlife Science: Linking Ecological Theory and Management Applications to be one of several books that will best seller in this year, that is because when you read this publication you can get a lot of benefit upon it. You will easily to buy this book in the book retail store or you can order it by way of online. The publisher of this book sells the e-book too. It makes you easier to read this book, as you can read this book in your Smart phone. So there is no reason for you to past this book from your list.

#### **Willie Collins:**

The book with title Wildlife Science: Linking Ecological Theory and Management Applications contains a lot of information that you can learn it. You can get a lot of help after read this book. That book exist new expertise the information that exist in this reserve represented the condition of the world currently. That is important to yo7u to find out how the improvement of the world. This particular book will bring you within new era of the glowbal growth. You can read the e-book on your smart phone, so you can read the idea anywhere you want.

#### **Robert Williams:**

Is it anyone who having spare time then spend it whole day through watching television programs or just telling lies on the bed? Do you need something new? This Wildlife Science: Linking Ecological Theory and Management Applications can be the response, oh how comes? The new book you know. You are and so out of date, spending your time by reading in this brand new era is common not a geek activity. So what these textbooks have than the others?
