Research and Development on Genetic Resources: Public Domain Approaches in Implementing the Nagoya Protocol (Routledge Research in International Environmental Law)

Research and Development on Genetic Resources: Public Domain Approaches in Implementing the Nagoya Protocol (Routledge Research in International Environmental Law)

National implementation of the Convention on Biological Diversity (CBD) provisions has yielded enough challenges for providers and users of genetic resources and associated traditional knowledge alike. The Nagoya Protocol brings novel ideas for resolving the challenges plaguing the Access and Benefit-Sharing (ABS) process in general and non-commercial research in particular. This is one of the first books to address research cooperation and facilitated access for non-commercial biodiversity research. It uniquely offers concrete and practicable solutions based on experiences of researchers and administrative officials with ABS, and on the interpretation of the Nagoya Protocol on how free and lively taxonomic research can be ensured while at the same time observing obligations of obtaining prior informed consent and sharing of benefits.

This book will be useful to students of International Environmental Law, International Biodiversity Law, Intellectual Property Law, Climate Law and Law of Indigenous Populations.

With foreword from Executive Secretary CBD, Bráulio Ferreira de Souza Dias.
