Intelligent Help Systems for UNIX

Stephen J. Hegner, Paul Mc Kevitt, Peter Norvig, Robert L. Wilensky

Intelligent Help Systems for UNIX Stephen J. Hegner, Paul Mc Kevitt, Peter Norvig, Robert L. Wilensky In this international collection of papers there is a wealth of knowledge on artificial intelligence (AI) and cognitive science (CS) techniques applied to the problem of providing help systems mainly for the UNIX operating system. The research described here involves the representation of technical computer concepts, but also the representation of how users conceptualise such concepts. The collection looks at computational models and systems such as UC, Yucca, and OSCON programmed in languages such as Lisp, Prolog, OPS-5, and C which have been developed to provide UNIX help. These systems range from being menu-based to ones with natural language interfaces, some providing active help, intervening when they believe the user to have misconceptions, and some based on empirical studies of what users actually do while using UNIX. Further papers investigate planning and knowledge representation where the focus is on discovering what the user wants to do, and figuring out a way to do it, as well as representing the knowledge needed to do so. There is a significant focus on natural language dialogue where consultation systems can become active, incorporating user modfelling, natural language generation and plan recognition, modelling metaphors, and users' mistaken beliefs. Much can be learned from seeing how AI and CS techniques can be investigated in depth while being applied to a real test-bed domain such as help on UNIX.

From reader reviews:

James Alvarez:

The e-book with title Intelligent Help Systems for UNIX has lot of information that you can learn it. You can get a lot of benefit after read this book. This book exist new knowledge the information that exist in this guide represented the condition of the world right now. That is important to yo7u to learn how the improvement of the world. This specific book will bring you throughout new era of the glowbal growth. You can read the e-book on your own smart phone, so you can read the idea anywhere you want.

Aaron Tolleson:

Your reading sixth sense will not betray anyone, why because this Intelligent Help Systems for UNIX e-book written by well-known writer who really knows well how to make book that can be understand by anyone who have read the book. Written in good manner for you, leaking every ideas and publishing skill only for eliminate your personal hunger then you still question Intelligent Help Systems for UNIX as good book not merely by the cover but also from the content. This is one reserve that can break don't determine book by its handle, so do you still needing yet another sixth sense to pick this kind of!? Oh come on your examining sixth sense already said so why you have to listening to another sixth sense.

Kathy Lloyd:

In this age globalization it is important to someone to obtain information. The information will make professionals understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of personal references to get information example: internet, newspaper, book, and soon. You can observe that now, a lot of publisher that will print many kinds of book. Typically the book that recommended for you is Intelligent Help Systems for UNIX this reserve consist a lot of the information of the condition of this world now. This kind of book was represented how does the world has grown up. The terminology styles that writer require to explain it is easy to understand. Typically the writer made some analysis when he makes this book. Here is why this book acceptable all of you.

Gary Askew:

This Intelligent Help Systems for UNIX is brand new way for you who has interest to look for some information mainly because it relief your hunger of knowledge. Getting deeper you into it getting knowledge more you know or else you who still having little digest in reading this Intelligent Help Systems for UNIX can be the light food for you because the information inside this kind of book is easy to get simply by anyone. These books acquire itself in the form and that is reachable by anyone, yep I mean in the e-book application form. People who think that in publication form make them feel sleepy even dizzy this guide is the answer. So there is absolutely no in reading a e-book especially this one. You can find actually looking for. It should be here for a person. So , don't miss the idea! Just read this e-book kind for your better life in addition to knowledge.
