Rivers in the Landscape: Science and Management Ellen Wohl

Rivers in the Landscape: Science and Management offers a comprehensive and accessible overview of the current state of knowledge for river process and form, taking a holistic approach to the subject with coverage of integrated river science and management in practice.

The processes and forms present in channelized surface flow—rivers—are systematically explored in this book to

- emphasize the connectivity between rivers and the greater landscape by explicitly considering the interactions between rivers and tectonics, climate, biota, and human activities;
- provide a concise summary of the current state of knowledge for physical process and form in rivers;
- reflect the diversity of river environments, from mountainous, headwater channels to large, lowland, floodplain rivers and from the arctic to the tropics;
- reflect the diverse methods that scientists use to characterize and understand river process and form, including remote sensing, field measurements, physical experiments, and numerical simulations;
- reflect the increasing emphasis on quantification in fluvial geomorphology and the study of Earth surfaces in general;
- provide both an introduction to the classic, foundational papers on each topic, and a guide to the latest, particularly insightful and integrative references.

Aimed at advanced undergraduate students, graduate students, and professionals looking for a concise summary of physical aspects of rivers, this book emphasizes general principles and conceptual models, as well as concrete examples of each topic drawn from the extensive literature on river process and form.

From reader reviews:

Clarence Hamm:

Nowadays reading books are more than want or need but also work as a life style. This reading behavior give you lot of advantages. Advantages you got of course the knowledge the rest of the information inside the book that improve your knowledge and information. The info you get based on what kind of publication you read, if you want have more knowledge just go with knowledge books but if you want feel happy read one together with theme for entertaining for instance comic or novel. The particular Rivers in the Landscape: Science and Management is kind of publication which is giving the reader unpredictable experience.

Trina Durham:

This Rivers in the Landscape: Science and Management is brand new way for you who has fascination to look for some information as it relief your hunger of information. Getting deeper you on it getting knowledge more you know or perhaps you who still having small amount of digest in reading this Rivers in the Landscape: Science and Management can be the light food in your case because the information inside this specific book is easy to get by anyone. These books develop itself in the form that is reachable by anyone, yes I mean in the e-book type. People who think that in reserve form make them feel drowsy even dizzy this e-book is the answer. So you cannot find any in reading a guide especially this one. You can find actually looking for. It should be here for anyone. So , don't miss this! Just read this e-book type for your better life along with knowledge.

Jonathan Thurman:

As a scholar exactly feel bored in order to reading. If their teacher inquired them to go to the library or make summary for some reserve, they are complained. Just very little students that has reading's heart or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading critically. Any students feel that reading is not important, boring in addition to can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So , this Rivers in the Landscape: Science and Management can make you feel more interested to read.

Rose Heck:

Reading a reserve make you to get more knowledge from the jawhorse. You can take knowledge and information coming from a book. Book is published or printed or illustrated from each source that will filled update of news. With this modern era like today, many ways to get information are available for an individual. From media social including newspaper, magazines, science e-book, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just seeking the Rivers in the Landscape: Science and Management when you necessary it?
