## Mitochondrial Oxidative Phosphorylation: Nuclear-Encoded Genes, Enzyme Regulation, and Pathophysiology: 748 (Advances in Experimental Medicine and Biology)

This book will describe the nuclear encoded genes and their expressed proteins of mitochondrial oxidative phosphorylation. Most of these genes occur in eukaryotic cells, but not in bacteria or archaea. The main function of mitochondria, the synthesis of ATP, is performed at subunits of proton pumps (complexes I, III, IV and V), which are encoded on mitochondrial DNA. The nuclear encoded subunits have mostly a regulatory function. However, the specific physiological functions of the nuclear encoded subunits of complexes I, III, IV, and V are mostly unknown. New data indicates that they are essential for life of higher organisms, which is characterized by an adult life without cell division (postmeiotic stage) in most tissues, after the juvenile growth. For complex IV (cytochrome c oxidase) some of these subunits occur in tissue-specific (subunits IV, VIa, VIb, VIIa, VIII), developmental-specific (subunits IV, VIa, and VIIa) as well as species-specific isoforms. Defective genes of some subunits were shown to induce mitochondrial diseases. Mitochondrial genes and human diseases will also be covered.

### **From reader reviews:**

#### **Joseph Benoit:**

What do you concentrate on book? It is just for students since they are still students or the item for all people in the world, the actual best subject for that? Just you can be answered for that question above. Every person has distinct personality and hobby for each other. Don't to be compelled someone or something that they don't need do that. You must know how great and important the book Mitochondrial Oxidative Phosphorylation: Nuclear-Encoded Genes, Enzyme Regulation, and Pathophysiology: 748 (Advances in Experimental Medicine and Biology). All type of book could you see on many sources. You can look for the internet solutions or other social media.

#### **Sally Rose:**

Now a day people who Living in the era exactly where everything reachable by connect with the internet and the resources inside it can be true or not need people to be aware of each facts they get. How a lot more to be smart in obtaining any information nowadays? Of course the solution is reading a book. Looking at a book can help folks out of this uncertainty Information particularly this Mitochondrial Oxidative Phosphorylation: Nuclear-Encoded Genes, Enzyme Regulation, and Pathophysiology: 748 (Advances in Experimental Medicine and Biology) book since this book offers you rich info and knowledge. Of course the information in this book hundred % guarantees there is no doubt in it you may already know.

#### **Marlene Clabaugh:**

Do you really one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you find out the inside because don't evaluate book by its deal with may doesn't work here is difficult job because you are scared that the inside maybe not because fantastic as in the outside seem likes. Maybe you answer might be Mitochondrial Oxidative Phosphorylation: Nuclear-Encoded Genes, Enzyme Regulation, and Pathophysiology: 748 (Advances in Experimental Medicine and Biology) why because the fantastic cover that make you consider about the content will not disappoint you. The inside or content is definitely fantastic as the outside or even cover. Your reading sixth sense will directly show you to pick up this book.

#### **Dave Arreola:**

As a university student exactly feel bored for you to reading. If their teacher asked them to go to the library as well as to make summary for some e-book, they are complained. Just very little students that has reading's soul or real their passion. They just do what the trainer want, like asked to the library. They go to right now there but nothing reading seriously. Any students feel that studying is not important, boring along with can't see colorful photographs on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this period, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Mitochondrial Oxidative Phosphorylation: Nuclear-Encoded Genes,

Enzyme Regulation, and Pathophysiology: 748 (Advances in Experimental Medicine and Biology) can make you experience more interested to read.
